

Victorian banded agate target brooch

Sold

Description

A mid 19th century Victorian banded agate target brooch, circa 1850.

Agate, a variety of chalcedony, is a semiprecious gemstone known for its stunning banded patterns and vibrant colors. Formed from volcanic activity, agate's unique layering makes each specimen distinctive. Valued in jewelry and decor, it symbolizes balance and harmony, and has been used in carvings and ornaments for centuries.
